
a. Composites
BESIDE
OVER
OCCLUDE
b. Behavior
output R^2
training parts V
c. State
input
untrained (dotted)
readout R^2, fresh parts
training parts V
d. Decoder vs. readouts
vocabulary: r=0.93 (0.50 within)
population (grey): r=0.73 (0.30 within)
output R^2, fresh parts
readout R^2, fresh parts
e. Parts, not pairs
output R^2
training parts V (140 pairs)
f. Width and occlusion
ceiling
readout R^2, fresh parts
bottleneck width m
role-filler decoder
MLP
CNN
transformer
