
a. Composites
BESIDE
OVER
OCCLUDE
b. Bottleneck width
output R^2
$m = kq$
bottleneck width m
c. Part diversity
output R^2
training parts V
d. Recovery predicts transfer
output R^2
fresh parts: r=0.94
held-out pairs (grey): r=0.61
recovery of fresh parts from h (R^2)
e. Relations
output R^2 on fresh parts
BESIDE
OVER
OCCLUDE
f. Seed spread, new roles
s.d. over seeds
training parts V
role-filler decoder
MLP
CNN
transformer
